Hi David -

Thank you for providing this information to me. I had originally signed up for updates on the project last year, so I am not sure when the mix-up occurred. Regardless, it appears that I am now on the distribution list. This will be most helpful.

Hi Robert,

I had a typo in your email in the original transmittal. My apologies for the oversight. You may also want to sign up on the website [to receive updates](#), since we will be using the list generated from that going forward.

Thanks,

-- David

Hi all,

I'd like to thank you all for dedicating the time to meet with the City staff at the [Figueroa Project](#) Update meeting last Tuesday. At the meeting we understood your preference to see a summary schedule of the project construction rather than LADOT's preference to help identify major events in advance that should be reflected in the final schedule. In response, we are reviewing phasing of construction-related activity that will be relevant to street operations. Once we have deemed the relevant information is included, we will share with the meeting attendants by the end of the week.

Once you receive the summary schedule, we ask that you identify major events that LADOT staff should be aware of during the construction. LADOT staff will review to assess if any adjustments are needed to account for major events. Note that there may be limited opportunity to adjust the schedule, however LADOT will continue to assist traffic performance during major special events through operational adjustments, such as modified signal timing and other traffic management measures.

We also understand that the summary schedule would empower our corridor partners to inform their constituent groups and customers that the operational capacity of Figueroa will be changing. While the changes are part of the exciting improvements to Figueroa, we understand that it may result in increased, if intermittent travel delays, and that it is important to inform people of the many travel options available that will help reduce the impacts to travel times. The purpose of the communication strategy of the ['Let's Fig it Out'](#) campaign is to inform people's travel options throughout construction and upon completion of the My Figueroa project.

We will also be providing updates on the construction schedule in the coming weeks [on the project website](#). We encourage you to direct people to the website [to receive updates](#).

Many thanks,

-- David
